

Expert Training on Agile (Scrum/eXtreme Programming), Lean and Lean Startup

Practitioner-to-Practitioner Training, Coaching and Mentoring!

We offer a variety of training courses which can be tailored to suit your development team. Our courses are anything but "by-the-book" rehashes of readily available scripts. Our immersive, fun filled hands-on approach and our wealth of practical knowledge gained from years of software development experience, ensures that the time you spend with us is a rewarding learning experience. We are in the business of training & coaching teams and we strive to make it efficient, effective and enjoyable.

It is unrealistic to claim that a single training program will make you the master of a subject. Trust us, shortcuts are not sustainable! Hence our unique training courses are created to quickly put you on the path of self-learning and continuous improvement. We can get you kick-started!

All of our courses offer following benefits:

- Unlimited access to course materials, sample projects and code examples with relevant tools
- Low participant-to-instructor ratio
- Heavy focus on hands-on learning experience
- Live demos and real-world examples
- Interactive activities/simulations to help understand the essence and concepts
- Open discussion and dynamic format

- Customizable

Post training, if your team needs help, we'll be happy to assist your team.
